Are you having trouble getting around since your last Physical Therapy appointment?

We are seeing patients who otherwise are at risk for falling, have a declining ability to function, or are post-surgery. We have in place precaution and cleaning standards to keep you and the therapist safe and healthy.

Patients wishing to be seen for therapy **are** being screened for possible exposure, high risk factors and current symptoms.

If you qualify for in-pool sessions, we are seeing patients one at a time. The clinic is disinfected between each patient and at each visit your body temperature is taken when you walk in the door. We do not allow an overlap where patients would be in close proximity with others. We do not allow visitors and we are not doing any fitpasses at this time.

If you **do not** qualify, we can provide a custom home program and educate you on what you can do at home to prevent further decline.
Call us for prescreening over the phone and possible scheduling.
Office number is 815-893-0439. Stay safe and healthy.
